Electric Guitars, Synths & Electronic Drums

Presets library for uvi Falcon

Oberheim 8000

Play techniques and modes:

## 1. Guitar control

- |  |  |
|--|--|
| <ul style="list-style-type: none"> <li>• Velocity             <ul style="list-style-type: none"> <li>- change timbre</li> </ul> </li> <li>• Mute (palm mute)             <ul style="list-style-type: none"> <li>- change timbre and length of tone</li> <li>- 0 % = no mute</li> <li>- 100 % = strong mute</li> <li>- mod wheel is set up for mute</li> </ul> </li> <li>• Vibrato             <ul style="list-style-type: none"> <li>- add vibrato</li> </ul> </li> <li>• Automatic / controlled             <ul style="list-style-type: none"> <li>- switch between automatic or controlled vibrato</li> <li>- with automatic vibrato, you can not control Vibrato Speed and Vib Attack</li> </ul> </li> <li>• Vibrato Speed (controlled vibrato)             <ul style="list-style-type: none"> <li>- change vibrato speed</li> </ul> </li> <li>• Vib Attack (controlled vibrato)             <ul style="list-style-type: none"> <li>- change attack of vibrato (0 % = vibrato start immediately, 100 % = vibrato start after some while)</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>• Pitch             <ul style="list-style-type: none"> <li>- change pitch</li> </ul> </li> <li>• Pitch Range             <ul style="list-style-type: none"> <li>- control pitch intensity</li> <li>- 0 % = no pitch</li> <li>- 50 % = 12 semitones (1 octave) up and down</li> <li>- 100 % = 24 semitones (2 octaves) up and down</li> </ul> </li> <li>• Pitch FX             <ul style="list-style-type: none"> <li>- while note is changing by Pitch control, it add some little effect and it change timbre. It depends on pitch range too.</li> </ul> </li> </ul> |
|--|--|

- Power Chord - play chord
  - for Strum and Off mode
  - play base note, perfect 5th note and octave up from base note
  - it is possible to use it for Solo mode, but it is not recommended. It can produce stack notes when you play two or more notes. If it happens click on stop button on Falcon panel.

- Pick Position
  - change timbre

- Release
  - change release time of played notes

- Solo
  - in this mode You can play only one note, each note will be overlapped by new note
- Strum
  - when You play chord (your own or by Power Chord mode) the bottom note will be played first and other notes in delay - this delay can be controlled by Distance
- Distance
  - control notes delay in Strum mode
- Off
  - deactivate Solo and Strum mode

- Release Noise
  - effect is played after release last note under Solo, Strum or Off mode
- Release Time
  - how long is effect

- Brightness Loss
  - change brightness sound, it is similar to Mute
- Velocity Brightness
  - change brightness loss by velocity

## 2. Effects Control

- FX On / Off
  - this button is for reverb and sometimes for other effects
- Guitar Box
  - turn on / off guitar box - you can quickly turn it off and use external guitar box.
- Pedals
  - turn on / off all distortions, overdrive and other distortion effects used in preset

- Volume
  - control Pluck volume
- Filter LP 2
  - control filter after guitar box2. FX control
